Assistant Professor (Tenure-Track) in Human Developmental Neuroscience

The Department of Psychology and the Center for the Neural Basis of Cognition (CNBC) at Carnegie Mellon University seek to fill the Ronald J. and Mary Ann Zdrojkowski Career Development Chair in **human developmental neuroscience** at the assistant professor, tenure-track, level. A successful candidate will be committed to high-quality teaching and should have a background that includes core areas within cognitive neuroscience, developmental neuroscience, or social neuroscience, a strong grounding in theory, cutting-edge methods, and experience fostering collaborations with other areas in psychology, development, cognitive science, and neuroscience. Carnegie Mellon is committed to an expansion of its faculty and facilities in the area of mind and brain research and is particularly seeking scientists who span multiple disciplines and employ multiple methodologies in their research. Facilities include a state-of-the-art MRI facility (http://www.sibr.cmu.edu), EEG, NIRS, and MEG systems, and several large-scale, high-performance computing clusters.

The appointment will be joint between the Department of Psychology and the CNBC. The candidate will join a growing and highly interactive computational, cognitive, and neuroscience community and is expected to be an active participant in the CNBC – an interdisciplinary and collaborative research and training center jointly administered across the Carnegie Mellon and the University of Pittsburgh. Carnegie Mellon offers highly competitive salaries and start-up packages in an attractive and highly livable urban environment.

Applications will be reviewed on a **rolling basis beginning immediately** and will continue until a suitable applicant is found or until January 31st, 2014. Applications, including a cover letter, a curriculum vitae, research and teaching statements, copies of no more than 3 relevant papers, and the contact information for at least three individuals who have been asked to provide letters of reference should be submitted electronically – in PDF format – to the following email address: faculty-search@cnbc.cmu.edu . Applications should indicate citizenship and, for non-US citizens, current visa status. Only complete applications in PDF format will be considered.

Concurrent with the submission of their application, applicants should also arrange for at least three reference letters – in PDF format – to be sent directly to: faculty-search@cnbc.cmu.edu.

If you encounter technical problems, please write to: faculty-search@cnbc.cmu.edu.
